ABSTRACT

1

- 2 A CPU upgrading adapter for an XBOX game machine is composed of a
- 3 circuit board on which a socket frame and a switched are electrically connected.
- 4 When the original CPU is removed from a motherboard of the XBOX game
- 5 machine, the CPU upgrading adapter is then mounted on the motherboard to
- 6 receive a new high speed upgrading CPU. Such an upgrading CPU is chosen
- 7 from an Intel® Pentium-III-STM CPU, a Pentium-III TM CPU or a CeleronTM
- 8 CPU.
